

Curriculum Vitae

Personal Details:

- **Name:** Wegdan Abdelrahman Ali Abdelhafiz
- **Nationality:** Egyptian.
- **Date of birth:** 21 / 12 / 1967.
- **Place:** El-Minya, Egypt.
- **Marital Status:** Married, three children.
- **E-mail:** wegdan21122000@yahoo.com
- **Mobile No.:** 01012764411
- **Current position:** Lecturer of Anaesthesia and Intensive Care, El-Minya University, Egypt.

Academic Qualifications:

1990 Bachelor Degree (MBBCh).

Faculty of Medicine, El-Minya University, El-Minya, Egypt.

1996 Master Degree in Anaesthesia and Intensive Care (M.Sc)

Faculty of Medicine, El-Minya University, El-Minya, Egypt.

2008 Medical Doctorate in Anaesthesia and Intensive Care

Faculty of Medicine, El-Minya University, El-Minya, Egypt.

Hospital Appointments:

March 1991 to Feb. 1992 **House Officer**

El-Minya University Hospital, Faculty of Medicine, El-Minya University.

March 1992 to March 1996 **Trainee in Anaesthesia and Intensive Care (Senior House Officer).**

El-Minya University Hospital, Faculty of Medicine, El-Minya University.

March 1997 to June 2002 **Assistant Lecturer in Anaesthesia and Intensive Care.**

El-Minya University Hospital, Faculty of Medicine, El-Minya University.

June 2002 to April 2003 **Clinical attachment** in Anaesthetic Department, Diana Princess of Wales

Hospital, Grimsby, England.

April 2003 to August 2003 **Locum SHO** in Anaesthetic Department, Hull Royal Infirmary, Hull, England.

September 2003 to Feb. 2006 **SHO** in Anaesthetic Department at University Hospitals of Leicester NHS Trust as a rotational post.

May 2006 to Feb. 2008 **Assistant Lecturer in Anesthesia and Intensive Care.**
El-Minya University Hospital, Faculty of Medicine, El-Minya University.

March 2008 to date **Lecturer in Anaesthesia and Intensive Care.**
El-Minya University Hospital, Faculty of Medicine, El-Minya University.

Clinical Experience:

In Egypt, after completing my house officer job, I began postgraduate training in Anaesthesia at El-Minya University Hospital, El-Minya, Egypt. During the training period, I achieved competence in the anaesthetic management of all the routine cases including day-case surgery, general surgery, gynecology and obstetrics, orthopedic, urologic, ENT, and eye surgeries, and laparoscopic procedures in general surgery and gynecology. I was trained to give general and regional anaesthesia including intrathecal, epidural, and caudal techniques. I also had on-calls for anaesthetic management of emergency cases. My work was fully supervised either in the theatre or in the hospital. As an assistant lecturer, I was involved in management of more complicated cases either elective or emergency.

In the UK, I did clinical attachment in Anaesthetic Department, Diana Princess of Wales Hospital, Grimsby. During this period, I have attended the preoperative assessment and anaesthesia of the surgical cases in a variety of surgical branches (including ENT, Ophthalmology, General surgery, vascular surgery, Orthopaedics, Gynecology & Obstetrics, dental, MRI and Urological cases).

Then, I had a locum SHO anaesthesia, Hull Royal Infirmary. I participated in the preoperative assessment, anaesthetic administration, and postoperative management of both adult and paediatric cases in these lists (general and vascular surgery, orthopaedics, urology, ENT, ophthalmology, and gynecology) with appropriate supervision in the theatre or in the hospital. Afterwards, I had a rotational post as SHO Anaesthesia at University Hospitals of Leicester NHS Trust. This post was organized by Leicester. I have done general duties, including general, orthopaedic, urologic, vascular, and ENT surgeries, at the Leicester General Hospital and Glenfield General Hospital; obstetrics at the Leicester Royal Infirmary; and general duties and ITU at the LRI. I have been out of Leicester to Grantham and Boston Hospitals. I had on-calls (covering emergency

cases, cardiac arrest, and acute pain management). In addition, I did the pain round as a member of the acute pain service team on my on-call days.

Then, on coming back to Egypt, I continued my job as assistant lecturer in anaesthetics till I have finished my Ph. D. thesis and I had been promoted to the lecturer post. During this period, I gained clinical experience in anaesthesia for cardiothoracic, vascular, and neurosurgical cases.

Research, Audit and Teaching:

- I was involved in a study about the laryngeal mask airway entitled “Comparison of the Laryngeal Mask Airway and Tracheal Intubation During Spontaneous Respiration”. This thesis was submitted to El-Minya university, Egypt for partial fulfillment of the master degree and accepted in 1996.
- I was also involved in a study entitled “Comparative Study of the Effects of Sevoflurane and Isoflurane Anaesthesia on Renal and Hepatic Functions” in El-Minya university hospital, Egypt, and it was submitted for partial fulfillment of the Ph.D. Degree. It was accepted in 2007.
- Comparative study between intraperitoneal bupivacaine and bupivacaine-nalbuphine for postoperative pain relief after laparoscopic cholecystectomy.
- Predictive value of EndTidal CO₂, lung mechanics and other standard parameters for weaning neurological patients from mechanical ventilation.
- Placenta Accreta Spectrum (PAS) disorders: incidence, risk factors and outcomes of different management strategies in a tertiary referral hospital in Minia, Egypt: A prospective study.
- Evaluation of ketamine versus midazolam as co-induction agents with propofol for laryngeal mask airway insertion in children.
- Role of the single-shot spinal analgesia to control labour pain in appropriately-selected primiparous parturients: A prospective observational study.
- Magnesium sulfate infiltration of pectoralis major muscle for postoperative analgesia following mastectomy. A randomized controlled study.

I participated in different audits while I was working in England. During my work, I actively involved in teaching and presented different topics about difficult airway management, alternatives to allogenic blood transfusion, labor analgesia, postoperative pulmonary complications.....etc.

Courses:

Advanced Life Support course (ALS): April 2003

Advanced Trauma Life support (ATLS): March 2004
