

My name is Alshymaa Ahmed Mohamed Hassnine, 41 years old from minya, Egypt, was born in 28-10-1980, married

I have(MBBCH): DEC. 2003 exellant with honor:85%

I was resident doctor in tropical medicine, gastroentrology department 1-3-2005 till 28 -2-2008

I have master degree of tropical medicine, hepatology and gastroenterology JULY 2008

I am an assistant lecturer in minia university hospital faculty of medicine since June 2009

My doctoral thesis was in NeuroPsychatric profiles in HCV chronic liver disease supervision of prof dr Madeha Makhoulf

I have M.D.degree at March 2016

I am a lecturer in minia university hospital faculty of medicine since June 2016

I work at minia university hospital GIT endoscopy unit since 2008 two days per week till now.

I have learned to do upper and lower GIT endoscopy

I have little experience about Small bowel video capsule endoscopy and enteroscopy

Lastly I try to learn EUS since October 2018 I try to attend regularly with prof dr Hussein okasha I am interested in it too much.

Clinical Experience

Minia University Hospital is the 2nd biggest hospital in Upper Egypt. It is a 1200 bedded hospital.

The Department of Tropical Medicine consists of about 30 beds including Hepatology and Gastroenterology Unit, Infectious diseases Unit , Abdominal Ultrasonography Unit and G.I.T. endoscopy Units.

-During residency period I had to attend every day in the outpatient gastroenterology and hepatology clinic and infectious disease clinic , 2 -3 days (24 hours) per week in the inpatient department and one day per week in the emergency department dealing with GIT emergency cases. I dealt with several hundreds of all the hepatic, gastrointestinal, and infectious diseases especially those prevalent in my country in addition to hepatic, gastrointestinal, and abdominal emergencies. This was in addition to 2 GIT endoscopy sessions per week; Abdominal Ultrasound session; -During period while I was an assistant lecturer I had to supervise residents in the hepatology , GIT outpatient clinic 2 days per week and one day (24 hours) in the inpatient GIT unit.

-Now I am a consultant one day per week in the hepatology , gastroenterology outpatient clinic and one day (24 hours) in the inpatient GIT unit.

-I participate in most of the seminars, journal clubs, case presentations and conferences related to my specialities and interests; and assistance in some clinically-based studies and projects.

Teaching Experience

- Assistant Lecturer of Tropical Medicine, from october, 2009 till june 2016 (Clinical Rounds) to 5th undergraduate medical students in Minia University Medical School.
- Lecturer of Tropical Medicine and gastroenterology from june, 2016 till now teaching clinical rounds three rounds per month and gives some lectures in gastroenterology and hepatology to 5th undergraduate medical students
- Participate in Postgraduate course teaching to residents and assistant lecturers some hepatology and gastroenterology lectures
